Polaris 3900 SPORT

Operating with a booster pump, the Polaris 3900 Sport acts as a roving return line in the pool, distributing clean, filtered water throughout the pool while cleaning. The all-wheel PosiDrive System delivers 50% more torque and is the most reliable and efficient drive train on the market. Durable plastics and stainless-steel hardware ensures years of dependable service.

With an easy twist-release connector and full-zipper access, the Polaris 3900 Sport Superbag is a snap to remove and clean. Its larger 5-liter capacity means more debris pick-up with fewer stops to empty the bag.

Designed for all in-ground pools, the Polaris 3900 Sport vacuums, sweeps and scrubs the walls and floor of any size or shape pool. The Sweep Hose provides effective cleaning even in tight, hard-to-reach areas.

With a completely re-engineered body design, the Polaris 3900 Sport ushers in the new level of Polaris "Sport Series" style and performance. For more information on Polaris products, call 1-800-822-7933 or visit www.polarispool.com.

Experience Built It, Style Defines It.

Built on 40 years of Polaris experience, the sleek new Polaris 3900 Sport offers the most technologically advanced features available in a pool cleaner and defines a new style of Polaris performance for your pool.
