

The Polaris Halcyon Booster Pump is 28% quieter than comparable pumps. Its compact size and adjustable volute provide more flexibility at installation. Redesigned components and simplified mechanics make it easier to install and to service.

- 28% quieter operation
- Full 360° volute adjustability
- Band clamp design makes flute rotation and removal easy with no tools required
- Wing-nut style drain plug requires no tools or silicone
- Seal is designed in units that press together for quick installation and easy replacement, no silicone or special tools required
- Patented design provides extra leak protection for the bearings
- Easy, 90-degree twist and pull shaft end cap releases with the simple turn of a wrench
